This Dual-Light™ Flashlight is cETLus, ATEX, and IECEx listed Intrinsically Safe for use in both above and below ground hazardous locations where explosive gases and dusts may be present. The XPP-5422GMX uses a CREE® LED rated at 210 lumens that works in conjunction with a high-efficiency deep parabolic reflector to create a usable flashlight beam rated at 187 meters. A 130 lumens unfocused floodlight is integrated into the housing which is perfect for close-up illumination. Additionally both the flashlight and the floodlight can be turned on at the same time for maximum versatility. The dual body switches provide momentary or constant-on functionality for the flashlight and on/off functionality for the floodlight. Additionally, the integrated magnets located in the base of the handle and the pocket clip, provide for almost limitless hands-free usage. Power comes from 3 AA premium batteries (not included).
